ELECTROSTATIC FILTER CASE STUDY

ALIA, FAJAR, BATOOL, SHAHAD 12G1

Metal

Dust particles small enough to be inhaled may lead to irritation of the eyes, coughing, sneezing, hay fever and asthma attacks. 800,000,000 get infected with these disease. Students of Al Wahda suggested a scientific solution for this problem.

Electrostatic air filters are a very effective way to improve the indoor air quality in your home. Therefore, if you are considering an air filtration system for your home, you may be looking for information about this type of filter and how it differs from other filtration systems.

Grade 12 students inquired about a scientific solution for dust problems using the working model of a dust purifier.

Aliaa Grade 12 – هكذا نتعلم الشعر في مدرسة الوحدة الخاصة – نشارك الشاعر تجربته الشعورية ونشاركه أفكاره وألمه وأفراحه

On 21st of September our students celebrated International Peace Day, students dressed in white and shared messages of peace and love.

Effective communication prepares the Young to educate themselves through their lives. In AWPS we empower students' voice in the classroom.

POVERTY

So, what is poverty?

NAJLA ALZAABI 11G2

Poverty is a state or condition in which a person or community lacks the financial resources and essentials for a minimum standard of living.

In my opinion, I see poverty as man made because just as humans have created great wealth, we have created great poverty.

The causes of poverty in every country are deeply rooted in the global system, which has been programmed over thousands of years to benefit the richest and most powerful people, to structural readjustment today.

So how can we help stop poverty?

Create Awareness. Social media has become an integral part of daily life, and now is the time to use it as a voice of social good
